Wireless Headphones PowerLocus Buddy Kids (Navy Red)

PowerLocus Buddy Kids Wireless Headphones (navy blue and red)

Discover the PowerLocus Buddy Kids wireless headphones - created especially with the youngest users in mind. They combine modern design, functionality and exceptional comfort tailored to the needs of children. The 40mm transducers provide great sound quality, and the built-in microphone allows you to talk freely.

Flexible connectivity options

PowerLocus Buddy Kids offer connectivity both wired, using a 3.5mm audio cable, and wireless - via Bluetooth 5.3, an extremely practical solution that allows children to listen to music comfortably in any situation. Now the little ones can choose how they want to use their headphones!

Powerful battery

The headphones feature a long operating time of 25 to 30 hours on a single charge. Don't worry that they will drain too quickly! What's more, it only takes about 2 hours to recharge them, so kids can quickly get back to listening to their favorite tunes without a long wait.

Adjustable volume limit

The PowerLocus Buddy Kids headphones support three volume limit modes: 74 dB, 85 dB and 94 dB. This makes it possible to adjust the

sound to a safe level for children. This is an extremely important feature that protects the hearing of the little ones from excessive noise, and thus from damage.

Exceptional sound quality

Thanks to 40-millimeter drivers, the headphones guarantee crisp and detail-saturated sound with a frequency response of 20 Hz to 20,000 Hz. As a result, children can enjoy clear and ear-pleasing sound for a fantastic experience whether listening to music or watching cartoons.

Comfort and durability

The PowerLocus Buddy Kids are lightweight (165 g) and designed for long-term use. The soft ear cups and adjustable headband ensure comfortable wearing even throughout the day. In addition, the foldable design and included carrying case make the headphones easy to store and transport - so your child can easily take them with them on vacation or on a trip!

Additional amenities

The headphones' built-in microphone allows you to talk freely with parents or other family members, and the ability to play music from microSD cards means that little users can conveniently access their favorite cartoons and songs in almost any situation. The PowerLocus Buddy Kids also feature stylish LED backlighting that is eye-catching and likely to appeal to most children.
