PowerLocus P2 wireless headphones for kids (blue)

PowerLocus P2 wireless headphones are ideal for kids. They combine convenience and safety of use, and provide excellent sound quality. They also allow you to play music from a variety of sources - via Bluetooth, via an audio cable or from a microSD card.

You will connect them in two ways

The PowerLocus P2 headphones connect to selected devices in two ways - they support both wired connection (via a 3.5mm audio cable) and wireless connection (via Bluetooth 5.3). This allows kids to choose the option that is more convenient for them!

Up to 20 hours of playback

The headphones have an operating time of about 15 to 20 hours on a single charge. This allows kids to listen to their favorite songs, watch cartoons or have conversations for a long time. You don't have to worry about the battery draining too quickly spoiling their fun! What's more, it only takes about 2 hours to charge the headphones - you'll have them ready to use again in no time.

Safe volume limit

PowerLocus P2 are equipped with an adjustable volume limit - 74 dB, 85 dB or 94 dB. This feature protects the delicate hearing of little ones from damage. This is an extremely important feature that ensures safety during long-term use. Don't worry about the health of your

child's ears!

Sound at a high level

The headphones are equipped with 40-millimeter drivers that provide clear and richly detailed sound with a wide frequency response from 20 Hz to 20,000 Hz. This allows children to listen to songs or watch cartoons with excellent audio quality.

For the comfort of the little ones

The P2 headphones were created to provide the utmost comfort for little users. They are very light - weighing only 165 g, and have soft earcups and an adjustable headband, so you can optimally adjust them to the shape of your child's head. Durable, hypoallergenic and harmful BPA-free materials were used to make them. In addition, the foldable design and the included carrying case make them easy to transport and store.

Even more conveniences

One of the advantages of the headphones is also the built-in microphone, which will allow, for example, to talk freely on the phone with grandparents or parents. What's more, the PowerLocus P2 allow you to play music from microSD cards. Rip your child's favorite songs and stories to an external storage device and be sure you know what he listens to every day!
