Wireless Headphones for kids PowerLocus PLED (blue&purple)

PowerLocus PLED wireless headphones for kids (blue-purple)

Meet the PowerLocus PLED wireless headphones for kids, which provide high sound quality and comfort. Thanks to 40-millimeter drivers, they offer excellent sound and are safe for the hearing of the youngest users. They are also distinguished by colorful LED backlighting, which is sure to appeal to little music lovers.

Versatile combination

The PowerLocus PLED headphones offer two connectivity options - you can plug them into your device wired, using a 3.5mm audio cable, or pair them wirelessly thanks to Bluetooth 5.3 technology. This ensures complete freedom of movement and convenience no matter what the situation!

Long runtime

Thanks to a powerful battery, the PowerLocus PLED headphones offer an impressive runtime of 25 to 30 hours on a single charge. This means you don't have to worry about them draining too quickly and preventing your child from listening to music or stories! What's more, it only takes about 2 hours to charge them - little users don't have to wait too long.

Excellent sound quality

The headphones are equipped with 40-millimeter drivers and offer a wide frequency response (from 20 Hz to 20 kHz). As a result, they provide richly detailed and crisp sound. In addition, there are three sound intensity modes (74 dB, 85 dB and 94 dB), so you can customize them to protect your child's hearing.

Exceptional comfort

The headphones have been designed with comfort in mind - soft memory foam, hypoallergenic materials and a lightweight design (only 165 g) mean that children can wear them for extended periods of time without feeling uncomfortable. In addition, the adjustable headband ensures a perfect fit. The PLED model also features a foldable design for convenient transport and storage.

Additional Features

This is not the end of the PowerLocus PLED's capabilities. The built-in microphone allows you to conduct conversations conveniently, and the LED backlighting gives the headphones a unique, modern character. It is also possible to play music from a microSD card - so you can rip selected songs or cartoons to an external medium and have more control over what your child listens to.
