

Charger SkyRC eN18 NiMH

Charger SkyRC eN18 NiMH

Ref: 6930460007186

SkyRC eN18 NiMH Peak Charger

The SkyRC eN18 is a powerful NiMH battery charger that has been designed for simplicity and efficiency of use. It uses a 1.2 A pulse charging method to ensure process reliability. What's more, it features a range of circuit protection features and is made from 100% environmentally friendly materials.

Efficient NiMH charging

This charger relies on functional solutions to optimise the charging process for NiMH batteries. With fixed 1.2 A current, the entire cycle is highly efficient and safe. What's more, thanks to the plug & charge system, topping up will start as soon as you plug in.

Trickle charge

NiMH batteries can self-discharge at a rate of around 1% per day. However, a trickle charge function can inhibit this process - significantly helping you to keep your power source in optimal condition. Opt for proven solutions with the SkyRC eN18!

Safe and eco-friendly

The device has been manufactured with attention to safety issues. The charger has high-grade insulation and a robust, flame-resistant casing. What's more, it's made from 100% environmentally friendly materials - without the use of toxic substances.

Easy to read interface

The charger has a clear interface, which is equipped with an LED. It informs about the status of the charging process with 4 types of indicator - Standby, Charging, Fully charged and Error.

Wide compatibility

Included with the charger you also get a removable adapter for other types of electrical sockets. What's more, working with an input voltage in the universal 100 - 240 volt AC range means you don't have to wonder whether your device is compatible with the power standard - wherever you are.

Kit includes

Charger

Compatibility Converter

Manual

Manufacturer

SkyRC

Model

eN18

Battery type

NiHM

Output voltage

4.8 V - 14.4 V

Output current

1.2 A

Output power

18 W Max.

Battery cell

4 - 8 S

Cable length

70 cm

Operating temperature

0°C - 40°C

Relative humidity

5%-75%

Storage temperature

-10°C - 70°C

Weight

120 g

Dimensions

85 x 50 x 54 mm

Preço:

€ 11.50

Modelismo, Charging, Carregadores, 230V
