Besen wall charger for electric cars F30 APP

Besen F30 APP wall charger for electric cars

Besen F30 is a wall charger for electric cars that offers a maximum charging power of up to 7.2 kW in single-phase mode. Equipped with a smart chip and LCD display, it provides full control over the charging process, presenting key information on amperage, power and charging time. With the dedicated EVSEMaster app, users can personalize charging settings, plan schedules and monitor charging session history.

Smart control and personalization of the charging process

The Besen F30 charger is distinguished by a built-in smart chip that monitors and optimizes the charging process, adjusting the parameters to the current needs of the vehicle and the user. In turn, the LCD display provides real-time information on current, charging power and session duration, allowing for precise energy management.

More convenient with the app

The dedicated EVSEMaster app allows you to customize the charger's operation. From it, you can schedule charging and set the maximum level and charging time for your vehicle. You also gain access to your charging history, which you can download and share. The app connects to the charger via Bluetooth and is available on Google Play and the App Store.

Advanced safety features

The Besen F30 is designed for maximum user safety. The charger has a number of safety features, including open circuit protection, low voltage protection and ground protection. In addition, warning and monitoring functions detect abnormalities in the charging state, minimizing the risk of malfunction and protecting both users and vehicles.

Durability and versatility in all conditions

The F30 features rugged ABS and PC construction, which provides resistance to mechanical damage and harsh weather conditions. With an IP66 rating, the charger is protected against water and dust, allowing it to be used safely. Moreover, it is CE and FCC certified, confirming compliance with international safety and quality standards.

Flexibility and charging performance

The Besen F30 is compatible with a wide range of voltages (100V-250V) and offers adjustable current (16/32A), allowing you to tailor charging power to your vehicle's specific requirements. A maximum charging power of 7.2 kW ensures fast and efficient energy replenishment, and an operating temperature range of -25°C to 55°C makes the charger suitable for a wide range of climatic conditions, guaranteeing year-round reliability.
