Water Fountain for pets Catlink Pure 2

Ref: 6972884750736

Smart Water Fountain/Dispenser for Dogs and Cats Catlink Pure 2

The Catlink Pure 2 smart pet water dispenser utilizes an effective ultrafiltration system that provides water free from pollutants and harmful substances, while taking care of the health of your pets. The device allows monitoring of your pet's drinking habits and reacting in real time to any abnormalities. A dedicated app makes it easy to operate and offers access to useful information. Cleaning individual components will not be difficult for you. A capacity of 2.6 liters eliminates the need for frequent refilling. There are 4 operating modes available.

Filtration for Pet Health

Catlink Pure 2 uses an advanced filter that ensures 99.99% water purity. The implemented solution helps to remove hair and micro impurities. Unpleasant odors are also effectively eliminated. Filtration precision of 0.01 micron ensures that the water is free from contaminants and softened, which is particularly important for the health of the urinary system of pets, and is also necessary for pregnant and nursing cats. Regular use of the device reduces the risk of urinary stones.

Monitoring Pet Drinking Habits

The water dispenser collects data on the frequency of drinking, the amount of water consumed, and the duration of drinking sessions. All information is available in the Catlink app, which generates health reports, helping to monitor your pet's health. In case abnormal

behavior is detected, you will receive a notification. This allows you to react early to concerning symptoms. The app also informs about low water level and the need for filter replacement (every 3 months), which helps maintain proper functioning of the device.

Comfort and Peace of Mind Everyday

The Catlink Pure 2 fountain offers a capacity of 2.6 liters. Thus, it ensures access to clean water for even two weeks, making it an excellent solution for people who spend a lot of time away from home and want to be sure their pet is always properly hydrated.

Several Operating Modes

Choose from 4 operating modes - Flowing, Eco, Smart, and Night. Each mode is designed with different pet needs and preferences in mind, allowing you to adjust the fountain's operation to your pet's habits.

Thoughtful Solutions

The noise generated by the water dispenser does not exceed 30 dB. Therefore, you do not have to worry that the operation of Catlink Pure 2 will scare your pet or disturb the peace of the household members. Additionally, dismantling individual components is smooth and trouble-free, allowing you to easily take care of the cleanliness of the device and provide your furry companion with the highest standard of hygiene.

Wireless Water Pump

The Catlink device is equipped with a wireless water pump, which eliminates the risk of electrical leaks, thereby increasing the safety of your pet.
