

Maintenance-free AGM VRLA Battery Green Cell AGM39 6V 7.2Ah

Ref: 5907813963360

Maintenance-free AGM VRLA Battery Green Cell AGM39 6V 7.2Ah (for alarm system, cash register, toy)

Maintenance-free AGM VRLA Green Cell AGM39 6V 7.2Ah Battery (for alarm system, cash register, toy).

Green Cell AGM AGM39 battery with 6V voltage and 7.2Ah capacity is a high-quality product, designed for a variety of applications. Thanks to its advanced AGM (Absorbent Glass Mat) technology, this battery is ideal for both buffer and cyclic operation, providing reliable performance and long life. Its sealed design prevents electrolyte leakage, allowing the battery to be used safely in various positions, not just vertical. This makes it a much safer alternative to traditional lead-acid batteries.

Advanced AGM technology - safety and versatility

The Green Cell battery uses AGM technology, in which the electrolyte is absorbed into a fiberglass separator, which eliminates the risk of leaks and increases the life of the device. This makes the battery ideal for powering a variety of devices, such as toys, cash registers, UPS systems, as well as photovoltaic installations. AGM technology guarantees high current capacity, longer operating time and complete safety of use, regardless of the battery's mounting position.

Cyclic and buffer operation - flexible applications

The AGM39 battery is designed for both cyclic and buffer operation. In cyclic operation, the battery acts as a stand-alone power source, making it ideal for frequent charging and discharging. In buffer mode, on the other hand, it acts as an emergency power supply, ensuring that connected equipment continues to work if the main power source fails. This makes the battery versatile and indispensable in

applications such as alarm systems, UPS, and emergency lighting.

Maintenance-free operation and long service life

The Green Cell AGM39 battery provides maintenance-free operation for more than 5 years, without the need for regular maintenance or topping up the electrolyte. The use of VRLA (Valve-Regulated Lead-Acid) valves allows the internal pressure to be self-regulated, which further increases the safety of use and extends the life of the battery. It is also resistant to vibration and shock, which makes it suitable for even the toughest conditions.

Convenient and safe use

Thanks to its sealed design, the AGM39 battery does not emit fumes and can be safely used in enclosed spaces such as offices and apartments. Its ability to be mounted in any position and its ability to withstand harsh conditions make it a reliable and convenient power source for many applications. Green Cell AGM battery is a guarantee of safety, performance and convenience.

Included

Maintenance-free AGM VRLA Green Cell AGM39 6V 7.2Ah Battery (for alarm system, cash register, toy).Kit:Screws + nuts

Name:Maintenance-free AGM VRLA Green Cell AGM39 6V 7.2Ah Battery (for alarm system, cash register, toys)Manufacturer:Green CellModel:AGM39Type:VRLA AGMVoltage:6VCapacity:7.2AhColor:BlackWeight:1.06 kgDimensions (length x width x height):151 x 34 x 94 mmOverall height (with connectors):100 mmTerminal:Faston 187 (F1)Internal resistance: $\leq 20\text{m}\Omega$ (at 25°C).Self-discharge:2% per month (at 25°C)Lifetime:More than 5 yearsApplication:Alarm systems, toysBuffer charge:6.75-6.9V (-10 mV/°C)Cyclic charging:7.2-7.5V (-15 mV/°C)Maximum charging current:2.16ACapacity range:Less than 10AhWarranty:24 monthsCondition:New
