

## Maintenance-free AGM VRLA Green Cell AGM34 6V 14Ah Battery (

Ref: 5903317227724

Maintenance-free AGM VRLA Green Cell AGM34 6V 14Ah Battery (for alarm system, cash register, toy)

Maintenance-free AGM VRLA Green Cell AGM34 6V 14Ah Battery (for alarm system, cash register, toy).

Green Cell's 6V AGM battery is a model made of high-quality materials, suitable for both buffer and cyclic operation. The battery is based on AGM technology, which means that the electrolyte is absorbed in a fiberglass separator, which prevents its leakage. This allows the battery to operate in many positions, not just vertical. This is a great, much safer alternative to lead-acid batteries.

### Green Cell AGM Battery

The heart of your devices more efficient than ever  
5+ years of service life  
Guaranteed safety  
Operation in various positions  
High current capacity  
Maintenance-free  
Shock and impact resistant

### What are AGM batteries?

AGM batteries are a type of lead-acid battery with high energy density. AGMs are sealed batteries in which the electrolyte is embedded in glass mat separators. This makes them safe and long-lasting and more durable than other types of lead-acid batteries. They also require no maintenance.

### Cyclic operation

The cyclic use of the battery is to use it as a stand-alone power source. AGMs of this type are prepared for very frequent charging and

discharging. Thus, they are used in wheelchairs, photovoltaic installations, golf carts, toys and lawnmowers.

#### Buffer operation

Buffer operation allows a battery to act as a backup power supply for a plugged-in device. A battery connected to a power system in the event of a failure of the main power source provides additional power. They are used in this way in alarm systems, UPSs, cash registers or emergency lighting.

#### Maintenance-free operation

Batteries made with AGM technology were created to ensure the greatest possible safety during use. Thanks to the self-regulation function (VRLA valves), AGMs provide up to 5+ years of maintenance-free operation. It increases the safety of the operation of the device, regardless of the position of the battery.
