

## Maintenance-free AGM VRLA Battery Green Cell AGM59 12V 4Ah (

Ref: 5907813969515

Maintenance-free AGM VRLA Battery Green Cell AGM59 12V 4Ah (for UPS, toys, cash registers, scales)

Maintenance-free AGM VRLA Green Cell AGM59 12V 4Ah Battery (for UPS, toys, cash registers, scales)

The maintenance-free AGM VRLA Green Cell AGM59 battery with a capacity of 4Ah and a voltage of 12V is a reliable power source for a variety of devices such as UPS, toys, cash registers and scales. Thanks to AGM (Absorbent Glass Mat) technology, the battery is characterized by high performance and long life, while being completely maintenance-free, eliminating the need for regular maintenance. The use of VRLA (Valve Regulated Lead Acid) technology ensures safe use, minimizing the risk of leaks and gas emissions. This is an excellent choice for those who value safety, convenience and reliability in powering their devices.

AGM Battery - The heart of your appliances more efficient than ever

5+ years of service life  
Guaranteed safety  
Operation in various positions  
High current capacity  
Maintenance-free  
Shock and impact resistant

What are AGM batteries?

AGM batteries are a type of lead-acid battery with high energy density. AGMs are sealed batteries in which the electrolyte is embedded in glass mat separators. This makes them safe and durable and more durable than other types of lead-acid batteries. They also require no maintenance.

Cyclic operation

The cyclic use of the battery is to use it as a stand-alone power source. AGMs of this type are prepared for very frequent charging and discharging. Thus, they are used in wheelchairs, photovoltaic installations, golf carts, toys and lawnmowers.

#### Buffer operation

Buffer operation allows a battery to act as a backup power supply for a plugged-in device. A battery connected to a power system in the event of a failure of the main power source provides additional power. They are used in this way in alarm systems, UPSs, cash registers or emergency lighting.

#### Maintenance-free operation

Batteries made with AGM technology were created to ensure the greatest possible safety during use. Thanks to the self-regulation function (VRLA valves), AGMs provide up to 5+ years of maintenance-free operation. It increases the safety of the operation of the device, regardless of the position of the battery.
