

### Catlink Pure 3 smart dog and cat fountain/drinker (white)

Ref: 6972884750880

Catlink Pure 3 smart dog and cat fountain/drinker (white)

Catlink Pure 3 smart dog and cat fountain/drinker (white).

Surround your furry friend with care and take care of their well-being. The Catlink Pure 3 smart drinker is designed with your pets' health and comfort in mind, so it provides water filtration and works extremely quietly. It also supports several modes of operation and comes with a 2.3-liter reservoir. The device works wired, and its maintenance will not cause you any difficulties and will not take much time. With support for the 2.4 GHz Wi-Fi band, you can connect Pure 3 to a dedicated app and check reports on your dog or cat's health.

#### 4 modes of operation

The Catlink Pure 3 smart drinker supports up to 4 modes of operation. Flowing (the default mode) guarantees a steady stream of fresh water, encouraging your pet to hydrate, while Eco provides a 3-minute water flow every 5 minutes. When you select Smart mode, the fountain adapts to your pet's behavior. How it works. When it detects your pet approaching, it will automatically change from Eco to Flowing mode. Another of the modes - Night - allows for a 20-second water flow every 2 hours. When the pet approaches the device in this mode, the flow will start, allowing the pet to drink for 20 seconds.

#### Effective filtration system

Thanks to a reliable filtration system, you can be sure that your pet will always drink the highest quality water. The innovative dual structure, which includes a fully enclosed filter and a stainless steel filter, guarantees effective purification and eliminates the risk of

bacterial growth. The ABS material used meets food grade standards, which translates into maximum safety for your pet. Thanks to Catlink, your beloved pet will have access to refreshing water, which will contribute to its health and condition.

#### Dedicated app

Monitor your pet's health from the CATLINK app, which records important data such as how often he drinks water. As a result, you can enjoy constant access to comprehensive reports that will help you better understand your pet's habits. If any abnormalities are detected, you will be notified immediately. Backups of the collected data are saved in real time. In addition, an OTA update will give you access to the latest features and improvements. From now on, you can take even better care of your pet's well-being!

#### For the sake of your comfort

When designing the drinker, Catlink focused not only on your pet's well-being, but also on your comfort. One filter is enough for 90 liters of water, so you can change it once every 60 days. As a result, you will save money and gain more time to devote to your pet. The capacity of the tank reaches 2.3 l, which is enough for 15 days (with a daily water consumption of 40 to 60 ml). The built-in sensor reminds you of water shortage, as well as the need to change the filter - you can track the information in the mobile app. In addition, disassembly and cleaning of the device are carried out smoothly, and the volume of its operation does not exceed 30 dB.

#### With your pet in mind

Give your beloved pet the best care with Pure 3. The innovative design of the device provides protection against biting and minimizes contact with your cat's delicate whiskers. With Catlink, your pet is completely safe!
