Microphone with charging case Apexel APL-MIC014 lightning, 2 pcs

APL-MIC014 Lightning microphone with charging case, 2pcs

The Apexel APL-MIC014 Lightning Wireless Microphones with Charging Case is the perfect solution for those who value convenience and sound quality. This set is ideal for recording interviews, vlogs, live streaming and many other applications, both indoors and outdoors. With advanced technology and intuitive operation, the APL-MIC014 offers exceptional audio clarity and connection stability.

Wireless range and freedom of movement

The Apexel APL-MIC014 microphones provide wireless freedom with a range of up to 20 meters for comfortable recording anywhere. The 2.4GHz wireless technology guarantees a stable and reliable connection without interference, allowing you the freedom to move and record without worrying about signal loss.

Advanced audio features

Featuring a high-sensitivity 360° omnidirectional microphone and intelligent noise cancellation technology, the microphones deliver superior sound quality, eliminating ambient noise and capturing a clear, natural voice. Real-time Auto-Sync technology and ultra-low latency (0.009 seconds) ensure that audio and video are synchronized in real time, which is crucial when recording professional video footage.

Compact and portable charging case

The Apexel APL-MIC014 kit includes a smart charging case that not only protects the microphones, but also provides fast and efficient charging. Thanks to its lightweight and compact design, the case can be easily carried, making the kit ideal for use on the go or during outdoor activities.

Easy to use and wide compatibility

The Apexel APL-MIC014 is plug-and-play, meaning that it does not require the installation of additional apps or a complicated pairing process. Simply plug the Lightning receiver into your iPhone and the device will automatically connect to the microphones, allowing you to start recording immediately. The microphones are compatible with multiple platforms such as YouTube, Instagram, Facebook and others, making them a versatile tool for content creation.

Versatility of use

Apexel APL-MIC014 microphones are ideal for a variety of applications, such as live recording, interviews, vlogging, conferences, and outdoor recording. Their high sound quality and ease of use make them an excellent choice for professionals and amateurs alike.
