Teclast P85TKids 8" tablet 4/64 GB WIFI (blue)

The Teclast P85TKids tablet is specifically designed to support children's development and education while providing a safe and engaging digital environment. With its durable design, advanced eye protection features, rich educational options and intuitive parental control tools, it is the ideal educational tool for young users. It stands out in the market not only for its functionality, but also for its attractive aesthetics that make learning an enjoyable and colorful adventure. The Teclast P85TKids is an excellent choice for parents who want to provide their children with valuable and safe play and a solid educational foundation in an increasingly digitized world.

Display and eye protection

The Teclast P85TKids tablet features an 8-inch IPS screen that offers a resolution of 1280x800 pixels and wide 178° viewing angles for a bright and clear image from any perspective. With advanced eye protection technologies such as reading mode and dark mode, the tablet protects children's eyes from excessive fatigue, which is crucial during prolonged use.

Performance and education

Powered by an octa-core Allwinner processor and Mali-G57 graphics, the Teclast P85TKids provides a smooth and responsive user experience, which is essential for educational apps and games. The tablet comes with 4GB RAM, 64GB ROM and expandable memory via Micro SD card up to 1TB, allowing you to store numerous educational content and applications. With the pre-installed TKids app, the

device becomes a center for learning and fun, offering a variety of educational scenarios and interactive stories.

Security and parental control

The Teclast P85TKids comes with an eco-friendly silicone case with anti-slip embossing that enhances the safety of use by children by protecting the device from drops. Integrated with Google Family Link, the tablet offers extensive parental control options, allowing you to manage the time children spend in front of the screen, block inappropriate content and monitor the device's location.

Multimedia and communication

The tablet features a 2MP AI dual-camera system that adjusts camera settings according to lighting conditions, allowing children to take clear photos. The 0.3MP front camera supports video calling, allowing you to easily connect with family and friends. With built-in stereo speakers and a 3.5mm headphone jack, kids can enjoy music, movies and games without interference.

Ergonomics and portability

The lightweight and sturdy design with a 360° swivel handle that also serves as a stand makes the tablet easy to hold and place in any position. The attractive design with artistic drawings of unicorns and flowers attracts children's attention and makes using the tablet even more fun for them.
