

360° Indoor WiFi Camera IMOU Ranger Dual 6MP

Ref: 6976391037014

360° Indoor WiFi Camera IMOU Ranger Dual 6MP

IMOU Ranger Dual 6MP indoor WiFi PTZ camera

IMOU Ranger Dual 6MP camera will help you take care of security in your home or office. Equipped with dual rotating lenses and smart features - it allows you to monitor two zones simultaneously. The device can also detect people and animals, and has a built-in speaker and microphone.

Monitor two zones simultaneously

The Ranger Dual has two lenses (3MP + 3MP) - one PTZ (Pan-Tilt-Zoom) and one fixed lens. This allows you to simultaneously monitor different areas, such as the living room, window or terrace. Ensure comprehensive protection in your home and be sure you won't miss anything!

Intelligent night vision modes

Enjoy clear images even at night. When it's dark, the camera can record both black and white and color video. The choice is yours! There is also a smart night vision mode, where the device automatically switches to recording color video when it detects motion.

Full protection

Have confidence that every nook and cranny of your home is properly monitored. The camera's PTZ lens can rotate 0-355° horizontally

and 0-90° vertically, while the fixed lens has a 355° horizontal and 15° vertical rotation. This way you don't have to worry about missing anything!

Precise detection with IMOU SENSE®

With IMOU SENSE® technology, the camera accurately detects the movement of people and animals, offering exceptional accuracy and speed. As soon as someone comes within its range, you will receive a notification on your phone! The device can also sound an alarm (110 dB) to deter possible burglars. The camera also detects unusual sounds, such as a baby crying or breaking glass.

Take advantage of the app

Try the Imou Life app and gain access to additional features. Settings for favorite points, detection zones and alarm sound allow you to customize the camera. You can also create work schedules for it. The device also has a built-in speaker and microphone, allowing you to conveniently communicate from your smartphone. Pass a message to other household members, greet unexpected guests or tell the courier where to leave a package! A paid subscription service, Imou Protect, is also available, which allows you to conveniently store your recordings in the cloud, offers enhanced AI technologies and allows you to share your device with up to 20 people.
