Torras Ostand Pro Case for iPhone 16 Plus (Transparent)

TORRAS Ostand Pro is a case designed with your iPhone 16 Plus in mind that provides unparalleled protection. Created with scratch- and damage-resistant materials, it effectively protects your phone from everyday hazards. Raised edges of 2.5mm around the camera and 1.5mm around the screen provide an extra layer of protection to keep your iPhone safe from scratches and damage. So you can put your phone on a variety of surfaces without worry, knowing that its most delicate parts are properly protected.

No more fingerprints

Using innovative Tora-Smooth technology, the TORRAS Ostand Pro case prevents fingerprints by keeping the back of your phone smooth and clean. No more annoying smudges - from now on, your iPhone will always look pristine, no matter how often you use it.

Multifunctional ring

The built-in ring in the TORRAS Ostand Pro case serves a dual role. You can use it as a comfortable grip to hold your phone securely in any situation, minimizing the risk of accidentally dropping it. In addition, the ring serves as a functional stand that allows you to position your phone at the perfect angle for watching videos, making video calls or taking photos. The 360° rotation and precision mechanism make every angle change smooth and stable.

Magnetic mounting and fast charging

The TORRAS Ostand Pro is designed to be compatible with MagSafe accessories, ensuring a strong and secure attachment. The perfect fit with magnetic car mounts and desktop accessories ensures that your iPhone stays in place, even on rough roads. In addition, the case supports fast and seamless wireless charging, so you can charge your phone without removing it from the case.
