Torras Install Master Privacy Glass for iPhone 16

Install Master Privacy Glass for iPhone 16

Torras' Install Master Privacy tempered glass will meet the requirements of iPhone 16 users. Exceptional durability, innovative privacy technology and the highest quality materials distinguish the accessory on the market. Provide your device with protection from damage and gain full control over your privacy in all conditions!

Protection against drops

With tempered glass of 9H+ hardness, Install Master Privacy offers up to 230% more durability than traditional protective glass. A layer reinforced with 3x ion exchange technology increases impact resistance by 128%. As a result, the accessory is resistant to drops from a height of about 2.4 meters - more than 8,000 drop tests have proven its reliability.

For the sake of privacy

Install Master Privacy uses SEGI Privacy Tech - thanks to the optimal angle of protection (25°), the screen is visible only directly in front of the user, which prevents unauthorized peeping. The solution used works well in crowded places, such as public transportation, ensuring privacy and data security.

Highest quality light transmission

The use of high-density molecules allows light transmission of 96%, which guarantees excellent image quality. The product minimizes distortion and provides a sharp, bright image while maintaining full touchscreen functionality. It also does not affect the quality of the displayed image, as confirmed by transparency tests, in which Install Master Privacy scored 34% better than standard protective glasses.

Resistance to damage

Thanks to its multilayer nanostructure, Install Master Privacy glass provides scratch protection of 10,000 cycles, making it one of the most resistant products on the market. The 9H reinforced edges protect the screen from mechanical damage, which is especially important for daily use.

Aesthetics and functionality

Install Master Privacy Glass is designed to provide the highest quality of use. The oleophobic coating effectively protects the screen from fingerprints and smudges, ensuring a clean and aesthetically pleasing appearance of the device at all times. In addition, the surface of the accessory is extremely smooth, which translates into comfortable use and seamless use of the device's touch functions.

For the sake of eye health

The Torras product is certified by TÜV Rheinland, which confirms its ability to effectively filter blue light. This makes staying in front of the screen less tiring for the eyes - the technology used protects users from the negative effects of exposure to blue light, while ensuring full comfort of use.

Manufacturer: Torras
Model: Install Master Privacy
Compatibility: iPhone 16
