

## ZigBee motion sensor SONOFF SNZB-03P + battery

ZigBee motion sensor SONOFF SNZB-03P + battery

Ref: 6920075740639

ZigBee Motion Sensor SONOFF SNZB-03P + battery.

The ZigBee SONOFF SNZB-03P is a motion sensor designed to automate and secure your home. Utilizing the Zigbee 3.0 protocol, it works with a variety of Zigbee hubs such as SONOFF NSPanel Pro, SONOFF iHost, SONOFF ZB Bridge Pro, SONOFF ZBDongle-E and Echo Plus 2nd Generation, allowing for easy integration into your existing smart home system. Detecting motion in less than 5 seconds, the SNZB-03P allows you to automatically turn on the lights when you walk by and turn them off when you leave the room, saving energy and increasing comfort in your daily life.

Reliable every day

The SNZB-03P is powered by a CR2477 battery (included), which provides a lifespan of up to 3 years, eliminating the need for frequent replacement and ensuring long-lasting, maintenance-free operation. This solution is ideal for those who appreciate convenience and reliability in the operation of home appliances. The housing made of durable PC plastic and compact dimensions (44x44x65mm) make the sensor fit perfectly into any interior. With a wide detection angle of 110° and a range of up to 6 meters, it is a versatile tool for monitoring motion in the rooms and stairwell of your home.

Security and automation features

The SNZB-03P motion sensor not only makes your life more comfortable, but also serves as a home security function. It can detect

unauthorized entrances and immediately trigger an audible alarm through the gateway, record video with the connected camera, or send a notification to your phone via the app, giving you full control over the safety of your family and property. Even in the event of a Wi-Fi network outage, local Zigbee scenes remain active, ensuring reliable operation of your automation and security system. You can rest easy!

#### Intelligent light detection

The SONOFF SNZB-03P motion sensor is equipped with an intelligent ambient light detection function, which automatically adjusts the lighting operation according to the conditions. When the sensor detects motion, it will independently assess whether the ambient brightness is sufficient or whether the light should be turned on. With this solution, you save energy by using the lighting only when you really need it, both during the day and at night.

#### Compatible with your assistant

The SONOFF SNZB-03P works with the eWeLink app, which allows you to fully control and monitor the sensor's operation from your smartphone. The app offers a range of features, such as setting up scenarios, instant notifications when motion is detected, and integration with popular voice assistants such as Alexa, Google Home, SmartThings, Alice and the IFTTT platform. This allows you to control your home with simple voice commands or automate everyday tasks such as turning on lights or activating cameras, making your home more comfortable and secure.
