Charger USB-C+USB-A 33W Essager GaN (black)

The Essager GaN USB-C+USB-A 33W EU Charger is a device that allows you to charge multiple devices simultaneously, so you'll never have to choose which one deserves priority again. By using innovative gallium nitride (GaN) technology, Essager has improved charging efficiency, reduced the device's size by up to 30% compared to traditional 20W chargers.

Top-Level Performance

Thanks to the use of gallium nitride (GaN), Essager has achieved an exceptionally efficient heat dissipation method, resulting in increased charging performance. Your devices will charge faster than ever before, without the risk of overheating or overloading.

Compact Design

One of the biggest advantages of this charger is its incredibly compact size. Just 82.4 x 42 x 26mm! This means you can take it with you everywhere without weighing down your bag or backpack. Perfect for travel, the office, or everyday use.

Comprehensive Protection

Your device's safety is a priority, which is why the Essager GaN charger is equipped with various types of protection, including surge protection, explosion protection, overcurrent protection, overcharging protection, electrostatic protection, and short-circuit protection.

Your devices are safe during every charging session.

Charge Multiple Devices at Once

With the Essager GaN charger, you can finally say goodbye to fighting over power outlets. Thanks to its two ports - USB-C and USB-A - you can charge your smartphone, tablet, headphones, and other devices simultaneously. This is the perfect solution for people who need to stay connected at all times.

Wide Range of Supported Protocols

No matter what devices you have, Essager GaN has got you covered. Support for protocols such as QC3.0, QC2.0, AFC, FCP, SCP, BC1.2, DCP, IP2.4A, PPS, PD3.0, PD2.0 ensures that you can charge virtually any smartphone, tablet, or other device while maintaining full control over the charging speed.
