Charger USB-C 20W Essager PD (white)

The Essager PD20W USB-C Charger, combining innovative technology and high-quality materials, is the perfect solution for demanding users. It not only provides fast and safe charging but also takes care of your device's well-being by intelligently adjusting the voltage.

Intelligent Voltage Adjustment

One of the most important features of the Essager PD20W charger is intelligent voltage adjustment. This advanced function reduces the current intensity as the battery level increases. This not only speeds up the charging process but also significantly extends the lifespan of your device's battery, ensuring longer and more efficient performance.

High-Quality Materials

The Essager PD20W charger is made of a durable PC and ABS composite. This material combination not only guarantees an elegant white appearance but also provides durability and resistance to damage. As a result, the charger is more robust and reliable, making it an excellent choice for those seeking long-lasting products.

Efficiency and Speed

The ES-CD30 model offers unparalleled charging speed thanks to PD20W technology. This feature makes the charger ideal for individuals

who value speed and efficiency. Charging mobile devices happens in the blink of an eye, which is particularly important in today's fast-paced life.

Safe Usage

Safety is a crucial aspect of any electrical device, and the Essager PD20W charger is no exception. It comes equipped with multiple protective features that safeguard both the charger and connected devices from overheating, overloading, and voltage spikes. This ensures peace of mind during use.
