QCY T13 ANC2 Earbuds (White)

Escape from the noise and enjoy fantastic sound quality. QCY T13 ANC2 earbuds offer ANC (Active Noise Cancellation) and come equipped with 10-millimeter drivers. Thanks to the four built-in microphones, they are perfect for phone calls as well. They provide up to 30 hours of usage time (with the charging case) and guarantee unparalleled user comfort. They feature comfortable, antibacterial ear tips, and their practical touch panels make them easy to operate. You can also download the dedicated QCY app to access additional functions.

Active Noise Cancellation (ANC)

Say goodbye to annoying noise and focus on what's most important to you. These earbuds support ANC and can cancel out unnecessary sounds by up to 28 dB. Now, it's just you and your favorite music! Prefer to hear what's happening around you? Simply activate Transparency mode - when you do, you'll have the freedom to listen to music without losing touch with your surroundings. It's the perfect solution when you want to chat with someone or are afraid you might miss an important announcement at the train station or airport.

Excellent for Calls

Now you can make phone calls without any obstacles, no matter where you are - even in exceptionally noisy environments. These

earbuds are equipped with four microphones that effectively capture your voice, and they also support an ENC (Environmental Noise Cancellation) algorithm that filters out unnecessary ambient sounds. This ensures that your callers will hear you without any issues - the QCY T13 ANC2 can even handle winds blowing at speeds of up to 25 km/h.

Superb Sound Quality

Discover your favorite songs in even better quality. The T13 ANC2 earbuds are equipped with 10 mm drivers, allowing them to deliver crisp vocals and deep, powerful bass. Additionally, the use of a special CCAW coil further enhances mid and high tones. All of this translates into an unforgettable musical experience.

Bluetooth 5.3

These earbuds use Bluetooth 5.3 technology, allowing you to enjoy a fast and stable wireless connection. They are also an excellent choice for gamers - with a low latency of only about 0.068 seconds, they guarantee perfect synchronization of sound and image. This makes your gaming experience even smoother and more enjoyable! Moreover, you can pair the earbuds with two devices simultaneously and switch between them effortlessly.

Extended Playback Time

No need to worry about the earbuds running out of battery too quickly. When fully charged, the QCY T13 ANC2 earbuds can play music for approximately 5.5 hours with ANC mode enabled, or up to 7 hours without it. Additionally, the included charging case extends this time to 22 hours with ANC mode or 30 hours without.

User Comfort

Enjoy the ultimate comfort when listening to your favorite songs. These earbuds stand out with their ergonomic design, ensuring a perfect fit to the shape of your ear and exceptional comfort. You don't need to worry about pain or fatigue, even after many hours of use. Another advantage of the T13 ANC2 model is the antibacterial ear tips, which are safe for your health and friendly to your skin.

Convenient Control

The earbuds have built-in touch panels, allowing you to conveniently pause playback, skip songs, activate voice assistants, or enable low-latency mode, among other functions. If you want additional features, install the QCY app, which allows you to customize the controls and adjust the sound equalizer (EQ) settings.
