Huangre HE0295 interactive bubble stand up paddle

Huangre HE0295 interactive bubble up toy.

The Huangre HE0295 toy is a versatile developmental tool for toddlers as young as 6 months old. It provides multi-level developmental stimulation while providing lots of fun. The colorful hoops, which can be stacked on a stick, teach logical thinking and cause-and-effect reasoning. Each hoop also acts as a rattle, stimulating auditory development and eye-hand coordination. The pyramid is equipped with a rounded base that allows it to swing, which develops the sense of balance and motor coordination.

A wealth of play possibilities

The interactive pyramid offers many different forms of play - from stacking the hoop, to pressing the elephant on top, to rocking the toy like a dancer. Rattle sounds, melodies, lights and happy elephant noises provide engaging and interactive play. The two-stage volume control allows you to adjust the intensity of the sounds to suit your baby and the environment. It's a great way to build a relationship with your little one, encouraging them to interact and explore the world.
