Huanger HE0801 interactive walker/pusher

The Huanger HE0801 interactive walker/pusher is ideal for parents who want to support their children in learning to walk in a fun and safe way. With interactive elements and attractive colors, the walker captures the attention of toddlers, encouraging them to explore and take their first steps. Equipped with a detachable disappearing board, it allows the child to draw and play creatively, developing imagination and artistic skills. The pull-out telephone with squeaker and rattle, and the mirror with dial to spin further engage the child, providing stimuli to support the development of visual perception and motor skills.

A wealth of features for baby's development

The Huanger HE0801 walker is equipped with a variety of interactive elements that develop the baby's senses and cognitive abilities. The multicolored piano with detachable keys allows learning the solmization range, and pressing the star on the piano starts cheerful melodies that stimulate hearing and develop musical sensitivity. In addition, rotating elements with different shapes and textures help develop manual and perceptual skills.
