ASIWO underwater scooter (green)

ASIWO MANTA is an electric underwater scooter that provides a unique experience for exploring the underwater world. Its 3 speed levels and compact design make it an ideal tool for water sports enthusiasts, both for adults and children over 14 years old. With advanced safety features such as a child safety lock, the ASIWO MANTA is safe and easy to use, making it a great choice for family fun in the pool or on vacation adventures.

Safety and ease of use

The scooter is equipped with advanced safety features, including a child safety interlock that prevents accidental starting. The device is extremely easy to use - just press the magnetic switches on the left and right sides to start your underwater adventure. The ability to swim while holding the device with one hand provides greater freedom of movement. What's more, when not in use, the scooter naturally floats, so you don't have to worry about it sinking.

Compact design

ASIWO MANTA features compact dimensions - 527 × 213 × 173 mm, so it will easily fit into the carry-on luggage of an airplane. In addition, it allows you to mount a GoPro camera, so you can conveniently record unforgettable moments spent underwater.

Power and performance

The scooter's twin motors provide incredible power, allowing it to reach speeds of up to about 5.6km/h. This allows users to explore the underwater world at depths of up to 40 meters. The scooter also features a powerful, replaceable battery that allows up to 35 minutes of continuous fun on a single charge, with a quick recharge in just 2-3 hours.

Ideal for a variety of water activities

The ASIWO MANTA scooter is perfect for use in water parks, shallow waters, snorkeling or ocean diving. It can also be used in aquariums or for underwater pursuits. Three speed stages allow you to adjust the speed to suit your individual needs and skills.
