TWS Haylou W1 ANC Headphones (blue)

TWS Haylou W1 ANC headphones offer advanced technology, exceptional comfort and style, meeting the expectations of the most demanding users. Whether you need headphones for playing computer games or listening to music, this model will work in any situation.

Unparalleled sound quality and professional technology

TWS Haylou W1 ANC headphones feature high-quality Hi-Fi audio technology, offering deep bass and clear highs thanks to a professional 10mm balancing driver. The tri-core CPU and standalone Hi-Fi 5 DSP technology provide a powerful setup that lets you enjoy every detail of your favorite music.

Advanced noise reduction

With advanced noise cancellation technology, the headphones eliminate up to 45 dB of ambient sounds. You can choose from three modes to customize your music experience: total noise cancellation mode is perfect for airplane, bus or train travel, ambient mode is perfect for listening to music or podcasts in libraries or cafes, and transparent mode is perfect for shopping or walking.

Crystal clear conversations

High-quality conversations are possible thanks to the advanced, built-in 6 microphones (three per earphone). The headphones provide

clear and noise-free phone calls, making them ideal for work and contact with loved ones. From now on, you can freely talk on the phone no matter where you are.

Excellent sound control

Innovative low-frequency dynamics and Active Electronic Crossover technology provide professional sound control, making every sound crystal clear and rich in detail. TWS Haylou W1 ANC headphones deliver a unique music experience at the highest level.

Long-lasting battery and convenient charging

The headphones' battery lasts up to 6.5 hours of continuous use, and the charging case extends this time to 35 hours. Now you can enjoy your music all day long without worrying about running out of power. This perk is perfect for long trips or hours of computer games.

Full control with the HAYLOU app

The HAYLOU app allows you to freely control your music, configuring EQ settings and noise reduction modes according to your preferences. The app allows full personalization to best tailor the sound to your taste, enriching your experience and giving you maximum comfort with your use.

Bluetooth 5.3 technology and low latency time

The TWS Haylou W1 ANC headphones feature state-of-the-art Bluetooth 5.3 technology, which provides stable connectivity and the ability to synchronize audio and video. With a low audio latency of just 65ms, the headphones are ideal for gamers who want to sharpen their senses and improve their reflexes.

Stylish design and ergonomics

The unique and stylish design of the Haylou W1 ANC headphones, their compact size and ergonomic design ensure comfort and convenience when wearing them. The headphones are ideal for both travel and everyday use, and the ability to switch between different devices makes them versatile and practical.
