Portable compressor, electric pump HOTO QWCQA001 (10.3 bar, 150 PSI, 2000mAh)

Portable compressor, electric pump HOTO QWCQA001 (10.3 bar, 150 PSI, 2000mAh)

HOTO QWCQA001 is a modern portable compressor that combines compact form and advanced technology to provide fast and precise inflation of tires and other items. Thanks to its high performance and ease of use, it is an indispensable tool for the car, motorcycle, bicycle or sports field.

Fast and convenient inflation

Thanks to its high power and modern design, the HOTO QWCQA001 compressor can inflate a car tire in just 2 minutes. The high-performance cylindrical air tank and magnetic motor enable fast pumping up to 150 PSI (10.3 bar). In addition, the special nozzle design makes it quick and easy to connect the device to the valve.

Intelligent automatic stop function

Safety of use is ensured by an automatic stop function when the programmed pressure is reached. The compressor offers five built-in pumping modes - for cars, motorcycles, bicycles, balls and a manual mode which allows quick start and adaptation to different needs.

High-capacity lithium-ion battery

The HOTO QWCQA001 is equipped with a safe lithium-ion battery with a capacity of 2000 mAh, which, when fully charged, can inflate up

to 10 tires (at 29-35 PSI). The device can operate in a wide temperature range, from -10°C to 45°C, making it ideal for use in all weather conditions.

Compact and handy design

The compressor is designed with convenience in mind. It can be operated with one hand, and its compact size allows it to be easily stored in a pocket, car glove box or motorcycle pannier. In addition, a built-in tire pressure gauge with ± 1 PSI accuracy allows you to accurately monitor and adjust pressure.

Versatile inflation modes

The device offers five inflation modes to suit a variety of applications, from cars to motorcycles, bicycles to balls. It is also possible to manually set the preferred pressure level, allowing for versatile use of the compressor.

Durable construction and additional features

The housing, made of durable engineering plastic, is impact-resistant, guaranteeing a long life for the device. The built-in LED light with SOS function allows safe pumping even in low-light conditions.

Included

Air pump Storage pouch Charging cable American air tube Presta valve adapter Needle valve adapter Quick release valve adapter

Name: Portable compressor, electric pump HOTO QWCQA001 (10.3 bar, 150 PSI, 2000mAh) Manufacturer: HOTO Model: QWCQA001 Size: Approximately 124.5x80x48mm (air pump only, no soft rubber handle) Weight: Approximately 520g Charging temperature: 5°C-40°C Operating temperature: -10°C-45°C Storage temperature: -10°C-45°C Air line length: 200mm Battery type: Lithium-ion rechargeable battery Battery capacity: 2000mAh (14.4 Wh) Operating noise: Approximately 80 dB(A), 1m distance from the product Rated input: 5V □ 2A Charging time: Approximately 3h Sensor accuracy: ± 1 psi Pumping pressure: 0.2-10.3bar / 3-150psi
