

## Stylus Nillkin iSketch S3 for tablet Samsung (black)

Stylus Nillkin iSketch S3 for tablet Samsung (black)

Ref: 6902048280021

Nillkin iSketch S3 stylus for Samsung tablet (black)

Do you like to draw on your tablet? Or do you often create notes? The Nillkin iSketch S3 stylus will certainly come in handy for you! With 4096 levels of pressure sensitivity, it provides smooth operation both when writing and drawing. Increased tilt sensitivity allows you to precisely control the details of your drawings, and the specially adapted fiber tip will serve you for a long time. The stylus also supports a floating window for efficient office and creative work, and thanks to electromagnetic induction technology, it doesn't require charging for uninterrupted use.

**Precision without compromise**

Whether you're working on illustration or technically demanding diagrams, iSketch S3 is sure to meet your expectations. Enhanced tilt sensitivity allows you to precisely control the details of your drawings, which is invaluable when creating artistic works or accurate notes. This allows you to create smooth transitions between thick and thin lines!

**Efficiency in office work**

The stylus not only supports creative projects, but also makes office work easier by supporting floating window commands. Just bring the tip close to the screen, press the side button and instantly access the command menu. It's ideal for anyone who needs quick access to functions and tools, whether you're working on documents or presentations.

Unique design for comfortable use

The stylus' slim design provides a comfortable grip even during prolonged use, so you can work fatigue-free and uninterruptedly complete your projects. Its magnetic design will allow you to store it safely on the side of your tablet without worrying about losing it. In addition, thanks to electromagnetic induction technology, the stylus does not require charging, eliminating the need for frequent plugging in.
