Homerunpet BF10 smart fountain/drinker for dog and cat

Homerunpet BF10 smart fountain/waterer for dog and cat

The Homerunpet BF10 is a smart pet waterer that provides constant access to clean and fresh water. With advanced features, three watering modes, quiet operation, and a portable and easy-to-maintain design, it is the perfect choice for any owner concerned about the health and comfort of their pet.

Intelligent water flow activation

The fountain is equipped with two microwave radars that detect movement and automatically activate the water flow. This encourages pets to drink more water, improving their overall condition. In addition, regular filtering every 12 hours for 2 minutes ensures that they always have access to clean, fresh water, free of contaminants.

Four-stage water filtration

The Homerunpet BF10 has an advanced filtration system that effectively removes hair, food debris and other contaminants from the drinker. The 3.57-degree sloped surface makes it easier for water to run off, which minimizes the risk of dirt collection. Thanks to the semi-transparent design, you can easily monitor the water level, and the battery level indicator and low water level warnings put you in full control of the fountain's operation.

Watering modes and quiet operation

The fountain offers three modes of operation that adapt to different needs - motion detection mode makes the water gush when the sensors detect the presence of a pet. Intermittent mode involves running water when motion is detected, and after 15 minutes it goes into sleep mode. Regular mode provides a steady flow of water around the clock. The fountain operates very quietly with a noise level of less than 20 dB, making it ideal for use in a domestic setting without disturbing pets or household members.

Convenient and portable design

Equipped with a 7800 mAh rechargeable battery, the Homerunpet BF10 provides up to 30 days of continuous operation or 60 days in intermittent mode. Fast charging via USB-C takes just 5 hours. With a wireless pump and charging station, the fountain can be set up anywhere in the house, and its portable design makes it ideal for short trips. Removable parts make it easy to clean, ensuring hygienic use.

Included

Pet drinker Filter Sponge filter Wireless water pump Type-C charging cable User manual

Manufacturer Homerunpet Model BF10 Power input 5V 2A Battery capacity 7800 mAh Charging time 5 hours Battery life 60 days (30 days when regular mode is enabled) Capacity 2.0 l (68 ounces) Noise level
