

## Hohem iSteady Pro4 Gimbal for Sports Cameras

Ref: 6971071551002

Hohem iSteady Pro4 Gimbal for Sports Cameras

### Hohem iSteady Pro4 Gimbal for Sports Cameras

The Hohem iSteady Pro4 Gimbal is an advanced, reliable and versatile tool for anyone who values excellent recording quality and ease of use. With its durable design, long battery life and extensive customization options, it is ideal for professionals and amateurs looking for the perfect gimbal for their sports camera. Choose the Hohem iSteady Pro4 and experience a new level of image stabilization!

### Advanced stabilization and technology for perfect shots

The Hohem iSteady Pro4 gimbal is the perfect image stabilization tool for extreme sports enthusiasts and travelers. Featuring 3-axis stabilization and the state-of-the-art iSteady 5.0 algorithm that effectively eliminates camera shake, the iSteady Pro4 guarantees exceptionally smooth footage in all conditions. Whether you're using a GoPro HERO, DJI OSMO Action, Insta 360 ONE R, or any other sports camera, this gimbal ensures stable and clear shots.

### Durable and reliable in all conditions

With an IPX4 waterproof rating, the iSteady Pro4 gimbal is ideal for recording in the rain, snow or even near a swimming pool. No matter what the weather conditions are, you can rest assured that your equipment will remain safe and functional. The ergonomic design of the mount ensures comfortable use even during long recording sessions, and the durable battery provides up to 14 hours of continuous operation. In addition, the gimbal can act as a power bank, allowing you to charge your camera while shooting.

#### Intuitive operation and full control over settings

The iSteady Pro4 was designed with simplicity and convenience in mind. Thanks to the quick-release clip with spring buckle, mounting the camera is quick and intuitive. The simple button design allows for easy control of the pan, tilt and roll axes. A single button press is all it takes to switch modes, and a clear indicator always tells you the current mode. The trigger button function activates the potential power of the motor, which is especially useful when the camera is moving quickly - the gimbal responds immediately, following your movement.

#### Versatile modes and personalization options

The iSteady Pro4 offers a variety of modes, such as inception, time-lapse, sports and POV (first-person perspective) modes for creative and dynamic shots. A dedicated app allows full customization of the gimbal's settings and modes, tailoring it to individual user preferences. Two 1/4 extension screw holes in the middle and bottom of the handle allow for the installation of additional accessories, such as extenders, fill lights, microphones or phone holders, further enhancing the device's versatility.

#### Ideal for outdoor activities

The Hohem iSteady Pro4 is an ideal choice for outdoor sports enthusiasts such as skateboarding, snowboarding, skiing, or for travel enthusiasts. With easy three-axis control and versatile modes, you can capture every moment in the best quality. No matter where you are, this gimbal ensures stable, smooth and professional recordings.
