Choetech ASC006 4G PTZ solar camera with 6W solar panel

Choetech ASC006 4G PTZ solar camera with 6W solar panel

Choetech ASC006 4G PTZ solar camera is a versatile monitoring device that combines advanced technology with exceptional performance. With solar power, full-color night vision, weather resistance and two-way intercom functionality, the camera is an ideal solution for monitoring any space where traditional connections are inconvenient or impossible.

Reliable protection in all conditions

Choetech's solar camera is an innovative device that provides full protection and monitoring without the need for a traditional WiFi connection. With support for 4G LTE networks, you can easily monitor your surroundings from the mobile app, and the use of Bluetooth technology allows for a fast and seamless connection without interference. The camera works perfectly regardless of the weather, making it ideal for a variety of environments.

Solar power and long-lasting operation

The Choetech ASC006 camera is powered by 6W solar panels, which ensure constant and reliable operation. Thanks to the built-in 9000 mAh battery, you don't have to worry about frequent charging - the device works continuously, even in harsh conditions. LiteOS software optimizes power consumption, making the camera extremely economical, with a standby current of only 250uA.

Advanced monitoring features

The camera is equipped with a PIR motion sensor with a detection width of 120 degrees, which provides precise and sensitive alerts. With its PTZ (Pan, Tilt, Zoom) function, it offers a 355-degree panoramic view and a 90-degree tilt angle for full coverage of the observed area. Full HD 1920x1080 resolution provides exceptionally clear images, while full-color night vision allows the camera to capture details even in minimal light. In addition, the camera supports on-demand cloud recording and micro SD card storage for recording storage flexibility.

Two-way communication and reliability in all conditions

A built-in speaker and microphone enable two-way communication with echo and noise cancellation, making the camera ideal for use in a variety of locations such as backyards, farms and construction sites. The camera is IP66 water and dust resistant and has an operating temperature range of -10 to 50 degrees Celsius, making it rugged and ready for any challenge.

Ideal solution for hard-to-reach places

The Choetech ASC006 camera is designed to operate in places where a wired connection or access to electricity is difficult. It will be perfect for fishing ponds, orchards, mines and construction sites, offering reliable protection and monitoring even in the most demanding conditions. From now on, you don't have to worry about the security of your yard.
