TWS Transformers TF-T10 headphones (yellow)

TWS Transformers TF-T10 headphones (yellow)

The Transformers True Wireless TF-T10 are high-end headphones designed for music lovers and gamers who appreciate excellent sound quality and modern features. With Bluetooth 5.4 technology, they provide a stable connection, low power consumption and extremely low latency, which is crucial when playing games. Ergonomic design, touch control and IPX5-rated water resistance are just some of the advantages that make them an ideal choice for those with active lifestyles.

Unparalleled sound quality and noise reduction

The TF-T10 headphones feature 10mm dynamic drivers that deliver powerful, deep bass and crystal clear highs. Using lossless high-definition rendering technology, the sound is extremely realistic and full of detail. In addition, ENC (Environmental Noise Cancellation) noise-canceling microphones ensure that your conversations will be clear even in noisy environments, which is invaluable for both work and gaming.

Convenience and touch controls

The Transformers TF-T10 offer intuitive and convenient touch panel controls that allow you to easily manage calls, music and modes. With one touch, you can switch songs, adjust volume, answer calls and quickly switch between music and game modes. It's ideal for people who want full control over their headphones without having to take their phone out of their pocket.

Reliable Bluetooth 5.4 connection

The TF-T10 headphones use the latest Bluetooth 5.4 technology, which provides a stable connection over a distance of up to 10 meters and a low audio latency of just 50 ms. This makes the headphones perfect for both listening to music and playing online games where every second counts. When first paired, they automatically connect to the sound source right out of the case, making them much easier to use.

Long runtime and fast charging

With a 350 mAh battery in the charging case, the TF-T10 headphones offer up to 60 hours of total playback time. One charge gives the headphones 6 hours of continuous use, and the case allows the energy to be renewed up to five times. What's more, charging with a USB-C cable takes just 1.5 hours, ensuring the headphones are always ready to use when you need them.

IPX5 resistance

The TF-T10 headphones are equipped with an IPX5-rated nano-coating that effectively protects them from water and sweat. This means you can enjoy your favorite music during intense outdoor workouts or walks in the rain without worrying about damaging your equipment. This makes them the perfect companion during any activity, regardless of weather conditions.
