Power Bank Mcdodo MC-3255 10000mAh, 22.5W, for Light (purple)

Mcdodo MC-3255 10,000mAh, 22.5W powerbank with Lightning cable (purple)

The 10,000mAh powerbank is a portable and powerful device designed for users looking for a reliable solution to charge their mobile devices on the go. Thanks to its compact design and built-in handle, carrying and transporting it will not be a problem. Equipped with an easy-to-read LCD display, it informs about the operation status, providing full control over the charging process. In addition, the powerbank meets international safety standards, so you can take it on a plane.

Fast charging and compatibility with many devices

The powerbank offers a maximum charging power of 22.5 watts. What's more, the ability to charge 3 devices simultaneously means you can easily connect your smartphone, headphones and other accessories at the same time. With support for PD3.0, QC3.0 and 22.5W SCP fast charging technology, the device works perfectly with Huawei phones as well as other iOS and Android devices. The Lightning connector and USB-C port allow you to quickly charge your devices with full capacity.

High capacity and long runtime

With a capacity of 10,000 mAh, the powerbank provides long-lasting power, allowing you to charge your smartphone multiple times - you can charge your iPhone 13 Mini to full about 2.5 times, and your iPhone 14 about 2 times. Meanwhile, you will renew the powerbank's energy in 3 h using the USB-C port.

Safety of use

The powerbank is equipped with advanced safety features that protect both the device and the equipment connected to it. This includes protection against overcharging, overheating, overvoltage, short circuit and over-discharge. So you can rest assured that your devices are safe while charging.
