

Mcdodo Magnetic Power Bank MC-4261 10000mAh, 20W (black)

Ref: 6921002642613

Mcdodo Magnetic Power Bank MC-4261 10000mAh, 20W (black)

Mcdodo MC-4261 magnetic powerbank 10,000mAh, 20W (black).

The 10,000mAh powerbank combines compact design with functionality, offering fast and secure charging both wired and wireless. With its magnetic attachment, sturdy design and compatibility with various smartphone models, it provides convenience for everyday use. What's more, temperature monitoring and overheat protection guarantee safe operation in any situation.

Fast wired and wireless charging

The powerbank uses 20W wired charging to charge your device up to 60% in just 30 minutes, which is ideal for situations that require a quick top-up. In addition, it offers wireless charging of up to 15 watts, providing fast charging without the need for cables.

Magnetic design

The powerbank features 28 strong magnets for a precise fit. The pulling force of 14N and the power of the 4440 GS magnets guarantee a secure hold on the device, even when moving, making it ideal for users who value mobility and security.

Protection against damage

The powerbank is equipped with an advanced NTC temperature sensor that monitors and regulates the temperature during charging, protecting the battery from overheating. In addition, it provides protection against overcharging, overcurrent, short circuit,

electromagnetic field, etc.

10,000 mAh capacity

With a capacity of 10,000 mAh, the powerbank can charge an iPhone 13 Mini about 2.5 times and an iPhone 14 up to 2 times, providing enough power for a full day of use. The high battery capacity makes it ideal for travel or situations where access to power sources is limited.

Compatibility with cases and ease of use

The device is fully compatible with popular case brands such as Mcdodo and Apple for convenient charging. The minimalist design and compact size ensure that the powerbank does not interfere with daily smartphone use.

Additional features and LED indicators

The device is equipped with 5 LED indicators that provide information on the status of the powerbank's operation. The product also has a USB-C port, which supports fast charging of both the powerbank itself and other devices. In addition, an intuitive button allows you to check the battery level and start/end wireless charging.

Included

powerbank
