Microphone with a clip PULUZ 3.5mm Jack 6m

Microphone with a clip PULUZ 3.5mm Jack 6m

The PULUZ PU427 microphone is perfect for recording vlogs and interviews, conducting online lessons, participating in video conferences, streaming, and more. It allows you to capture high-quality sound and intelligently reduces noise. It comes equipped with a 3.5mm connector, making it easy to connect to various devices, from cameras to smartphones. Its additional advantage is a practical clip, allowing you to attach it to your clothing, for example. The package also includes various types of windshields (sponge and fur), an LR44 battery, and a carrying case.

High-Quality Sound

This omnidirectional microphone excels in various applications. It reliably captures sound from all directions and stands out with its high sensitivity. It guarantees natural, clear sound - forget about annoying noise. Furthermore, thanks to intelligent noise reduction, you can work confidently in almost any conditions without worrying that unwanted noises will ruin your recording. Note: the recommended distance between the microphone and the sound source is a maximum of 20 cm.

Wide Compatibility

The microphone is compatible with many popular devices such as smartphones, cameras, DSLR cameras, and audio recorders. It is equipped with a 3.5mm connector, allowing you to easily connect it to your chosen equipment. You don't have to worry about

complicated setup - the PU427 model supports plug-and-play. Furthermore, the long 6-meter cable provides freedom of movement and ease of use.

Useful Accessories Included

The package also includes several practical accessories. A special case makes it easy to transport the microphone, and small clips allow you to attach it to your shirt or blouse. You also have various windshields at your disposal - made of sponge and fur. Thanks to them, you can record without obstacles, even outdoors, even when the weather is unfavorable. The package also includes a 1/4" adapter.

2 Operating Modes

The PU427 microphone can operate in 2 modes - Phone and SLR. To select one of them, simply use the built-in switch. This means that you can easily adjust the device to your needs! Furthermore, in Phone mode, there is an option for sound monitoring using headphones - so you can have full control over your recording.
