Mechanical gaming keyboard Motospeed CK69 RGB (white)

Motospeed CK69 mechanical gaming keyboard

Motospeed CK69 is a mechanical gaming keyboard that is designed with a compact design and dynamic RGB backlighting. All you need to connect the device is a USB-C cable, and Gateron switches will ensure comfort.

High-performance switches

The keyboard features 67 Gateron keys, which have a lifespan of up to 50 million clicks. What's more, each of them is equipped with a sublimated polymer overlay that has been sublimated five times. This means that the comfort of use is on a completely different level. In addition, if you want to swap places of the buttons - you can do it even while the device is running!

A new dimension of gaming experience

The device features RGB-type backlighting. Discover a new, higher level of immersion while playing your favorite title! In addition, the keyboard is designed to contain only the most necessary keys for gaming. The 67 keys perfectly match the demand, and the keyboard itself gains in compactness.

Ergonomic design

By ridding the keyboard of 37 buttons that are unnecessary for gamers, a number of solutions have been made to bring gaming comfort

to a whole new level! The key buttons are positioned closer together, making key combinations much more accessible. What's more, there will never be a conflict when pressing several keys, and these keys have extremely fast responsiveness.

Multimedia control

The device also has a dial, with which you can easily and conveniently take control of multimedia. With its help you can set the volume and stop or resume a song. In addition, the keyboard is equipped with function keys that extend the functionality of the equipment. With CK69 you have everything you need, but without unnecessary extras!

Wide compatibility on a single cable

You'll connect the Motospeed CK69 with just one USB-C cable. Forget about tangled cables, now you can easily configure your gaming rig! The device is compatible with Windows XP, Vista, 7, 8 and 10.
