Rockbros bicycle bell 34210002003 (black)

Take care of your safety while riding your bike. The electric bicycle bell will allow you to signal your presence in case of danger. The bell is small, distinguished by its wide compatibility, so you will successfully mount it on almost any handlebar. It is easy to use and generates as much as 120 dB. It is IPX4 rated, and its battery has been additionally protected to protect the entire mechanism from rain. Thoughtful design makes mounting the bell child's play.

Signal your presence

The Rockbros bicycle bell is distinguished by its high power output. 2 CR2032 batteries with a voltage of 3V are responsible for power supply. As a result, the signal volume is as high as 120 dB, so you can effectively warn passers-by and other vehicles - the sound will be clearly audible in traffic.

Solid workmanship

The product is made of solid ABS and PC materials, so it is resistant to wear and tear. Its protection rating is IPX4, so it won't be harmed by light rain. For greater protection of the mechanism from water, the battery compartment has been additionally sealed. Also noteworthy is the mounting method - thanks to the elastic straps, you will mount the bell on almost any handlebar, and the presence of a non-slip pad provides it with the required stability.
