Mobvoi TicWatch E3 smartwatch

Now you can have everything you need at your fingertips. The Mobvoi TicWatch E3 smartwatch supports the advanced Wear OS, allowing you to conveniently use useful apps like Google Pay and Spotify. It is also compatible with Google Assistant and has built-in GPS. It measures heart rate and blood oxygen saturation, monitors sleep, and lets you choose from more than 20 sports modes. The durable battery provides long battery life, and the Qualcomm Snapdragon Wear 4100 Platform chip ensures smooth, fast performance.

Large, easy-to-read display

Convenient operation of the smartwatch is enabled by a 1.3" color display made of curved 2.5D glass with a high resolution of 360x360px. It provides a clear, readable image in almost any light. You can also customize its appearance to suit your preferences. Choose one of the screen designs available in the application or create your own - upload your favorite photo and give the device a unique character.

Wear OS - simple and convenient operation

The Wear OS operating system makes the smartwatch not only very easy to use, but also gives you plenty of useful capabilities. It supports Google Pay payments - no more searching for your wallet every time you shop! It also supports popular apps like Spotify and Google Fit. It's also compatible with Google Assistant, so you can easily control your smart devices with voice commands. TicWatch E3

also lets you handle phone calls, check your calendar, and use Google maps.

Reliable performance - long life

What makes a smartwatch run so smoothly and reliably? The device is equipped with Qualcomm Snapdragon Wear 4100 Platform chip, which allows you to forget about stuttering and lags. It also ensures that the device lasts longer. What's more, when the battery level drops below 5%, the smartwatch automatically goes into Essential mode, which allows it to run even longer. You can also enable this mode at night or at specific times to save power.

Get healthy

Gain access to valuable information about your body and respond immediately to any alarming symptoms. The smartwatch can monitor your heart rate 24 hours a day, generates weekly graphs and alerts you immediately to alarming changes. It also measures blood oxygen saturation. A sleep monitoring feature called TicSleep 2.0 is also available to help you better understand your biological clock, develop good habits, and start waking up rested!

A moment of relaxation

Everyone deserves a little relaxation. To help you unwind after a long, challenging day, the TicWatch E3 comes with the TicZen app, which monitors your stress levels and measures the ambient volume with TicEar. When it detects that you might need a moment of quiet, it will notify you and help you do some relaxing breathing exercises to help you regain your inner peace.

Get in peak shape

Improve your fitness. TicWatch E3 offers more than 20 sports modes such as climbing, soccer and ping-pong, for example. It also supports short but intense 30-minute HIIT workouts. It also allows you to set goals and when you reach them, you'll be notified by an audio message - thanks to the built-in speaker. What's more, thanks to the TicMotion feature, the smartwatch can automatically detect selected exercises and record data such as calories burned or heart rate during activity.

Built-in GPS

Are you going for a bike trip? Or maybe you have a mountain hike ahead of you? You no longer have to rely entirely on your smartphone's navigation! TicWatch E3 has a built-in GPS, GLONASS and Beidou positioning system. So you can check your routes and discover new paths. Don't worry about losing your way - with this indispensable smartwatch on your wrist, you will easily find your way in the field.

Elegant and durable

The smartwatch is not only functional, but also looks really elegant - it can be a perfect addition to almost any styling. Polycarbonate frame is very durable, yet lightweight - TicWatch E3 weighs just 32g. The device's strap is made of flexible, durable silicone that is skin-friendly and comfortable to wear.

More possibilities with the Mobvoi app

Pair your smartwatch with the Mobvoi app and enjoy convenient access to a wealth of useful features and information. Check workout reports and change settings. You can also share data with selected friends and track their progress and achievements. Get competitive and get in shape together with your friends. In addition, TicCare lets you remotely check the health information of your loved ones, such as heart rate or sleep quality.
