Freewell FujiX100 filter set with lens hood (black)

Freewell FujiX100 filter set with lens hood (black)

The Freewell FujiX100 Filter Set is an indispensable accessory for any photography enthusiast who wants to take the quality of their photos to the next level. Featuring an innovative combination of a polarizing filter (CPL) and a 1/4 Glow Mist filter, this set provides superior control over light and color, and adds a subtle, artistic blur effect.

Innovative Hybrid Filter

The Freewell FujiX100 filter set is a unique combination that combines the advantages of two advanced filters. The Innovative Hybrid Filter combines the functions of the Circular Polarizer (CPL) for glare reduction and color enhancement with the soft blur and glow effect of the 1/4 Glow Mist filter. As a result, the filter provides both excellent clarity and a cinematic, artistic look to your photos.

Adjustable polarization for better control

With a rotating CPL component, the polarization level can be easily adjusted to suit your needs. This allows you to precisely manage glare reduction and color saturation, which is ideal in a variety of lighting conditions. Whether you're shooting in bright sunlight or softer light, the FujiX100's Freewell filter gives you full control over the end result.

Protect your lens with a lens hood

A lens hood is also included to reduce unwanted light and flare, while providing solid protection from scratches and mechanical damage. The hood not only extends the life of your lens, but also helps you get better quality photos by minimizing light interference.
