Smartwatch Mobvoi TicWatch C2+ (Onyx)

Ref: 6940447102810

Mobvoi TicWatch C2+ smartwatch

TicWatch C2+ is a combination of classic and modern technologies. The smartwatch's design is reminiscent of classic watches, but it has been equipped with a number of useful functions. With it, you can pay for purchases, read notifications from applications, or use the voice assistant. It also has a built-in GPS, and the 1 GB internal memory enhances the performance of the device. 24/7 heart rate monitoring and sports modes are other advantages of the TicWatch C2+. The 400 mAh battery provides up to 2 days of battery life, and the high water and dust protection positively adds to its durability.

Your personal assistant

Pay cashless with the C2+ smartwatch. The Mobvoi smartwatch is also equipped with Google Assistant, so you can, for example, search for the information you need on the Internet via voice commands. Precise GPS will help you easily reach your destination, and thanks to high water and dust protection (IP68) you can take it for a workout.

Personalize its look

The smartwatch offers a number of dial designs to choose from, which you can set, giving the C2+ a unique touch. In addition, an extra strap is included, so you can swap them out as needed.

Wear OS from Google

The TicWatch C2+ Mobvoi smartwatch supports Wear OS from Google, offering convenient access to your most important information. With it, you can instantly check new notifications, messages, or use Google Maps. Now everything you require is right at your fingertips.

Monitors health

C2+ monitors your heart rate around the clock, providing you with vital information. This way, you'll know about alarming symptoms and respond to them in a flash. You can also use sports modes, for example, running or cycling, and the smartwatch will automatically detect the type of exercise you are doing.

Included

smartwatch
charging cable
extra 20 mm silicone strap
user manual
