The TWS Mobvoi TicPods 2 Pro+ Wireless Headphones

Enjoy fantastic sound quality when you listen to music, talk on the phone or play games. The TWS Mobvoi TicPods 2 Pro+ headphones feature 13mm drivers to deliver clear, detailed sound. They also have built-in noise-canceling microphones. You can operate them with a touchpad, head movements, and even voice commands. Bluetooth 5.0 ensures reliable transmission, and the long-lasting battery is responsible for the long runtime.

Operate with gestures or voice commands

No need to reach for your smartphone to operate your headphones. The TicPods 2 Pro+ support simple voice commands - with just a few words you can, for example, pause music, switch a song, activate a voice assistant or answer a phone call. The built-in touchpad makes it convenient to adjust the volume with just a swipe up or down. You can also free your hands and control the headphones with movement. Nod your head twice to answer an incoming call or shake it twice to reject it.

Fantastic sound quality

Discover the magic of music anew and become even more immersed in the world of your chosen movie or game. The headphones have large 13mm drivers built in and deliver excellent quality, richly detailed, crystal clear sound. They also support the Qualcomm aptX Audio codec - use the dedicated Mobvoi app to activate this option. Try the TicPods 2 Pro+ and see how fantastic the songs you love can

sound.

Reliable wireless connection

Say goodbye to problems with poor signal quality. TicPods 2 Pro+ headphones use Bluetooth 5.0 and Qualcomm's flagship QCC5121 chip to give you a fast, smooth and stable wireless connection with incredibly low latency. Perfect video and audio synchronization will allow you to comfortably watch movies and play even extremely dynamic games. Plus, each handset connects to the device of your choice independently.

Talk on the phone where you want

Now you can talk freely on the phone even in extremely noisy environments - for example, in the city center or on the bus. TicPods 2 Pro+ are equipped with dual microphones and advanced sensors for effective noise reduction. This way they will reliably record and emphasize your voice, while filtering out unnecessary background noise. This gives you the confidence that you and the person you talk to will hear each other perfectly!

You'll charge them in no time

Now your favorite songs can accompany you for as long as you want. The headphones play music for up to 4 hours on a single charge, and the included case lets you extend that time to about 20 hours. Dead when you least expect it? No problem! With just about 5 minutes in the charging case, TicPods 2 Pro+ can serve you for another hour.

Designed for your comfort

Don't worry about fatigue or discomfort when you listen to your favorite songs for hours. TicPods 2 Pro+ are extremely lightweight and comfortable. Thanks to their ergonomic design, they fit perfectly in your ears without falling out or causing uncomfortable pressure. What's more, the charging case of the headphones is so compact that you can always have them with you - you can easily fit them in your purse, backpack, or even pocket. The TicPods 2 Pro+ also detect if you have them in your ears.

Even more possibilities with the app

Do you want additional capabilities? Install the Mobvoi app, which is available for Android and iOS smartphones. With it, you can update your headphones, check the battery level and adjust the smart controls. Change settings, use a variety of useful features and take your music experience to a whole new level.
