WiFi RGBW 16M Gosund LB2S Tuya smart night light

Gosund LB2S Tuya WiFi RGBW 16M smart night light

The LB2S bedside lamp is the perfect solution for any bedroom, whether small or large. It has a compact size and a charming, interesting design that will fit perfectly into a bedroom or a child's room. You can use the app to change its color and brightness, as well as program its operation. The lamp is compatible with Google Assistant and Amazon Alexa and operates on the 2.4GHz Wi-Fi band.

16 million colors

Choose from the available colors in the RGB palette and light up your bedroom or child's room to match your decor, or your favorite hue. Brighten and dim the light as needed and let falling asleep become more enjoyable.

Control with the app

Control the capabilities of the light directly from the app. Change the brightness of the light it generates or simply program it to turn off at the right time. Schedule it to signal older children that it's time for bed, or set it to turn off forward just after you fall asleep.

Compatibility with assistants

With compatibility with Google Assistant and Alexa, you can give voice commands to the lamp to control its capabilities. Connect the lamp to your home smart ecosystem to control all the lighting in your home. Teach your kids to give voice commands and let the fun

continue.
