

iPega PG-9021S Wireless Controller / GamePad

iPega PG-9021S Wireless Controller / GamePad

Ref: 6974363711566

iPega PG-9021S

The controller allows Bluetooth connectivity to be maintained at distances of up to 8 meters, and the data transmission itself is fast and efficient. Using the controller does not require installing any drivers, just pair the device with the controller via Bluetooth. The gamepad is equipped with multimedia buttons that allow you to control the volume, switch tracks, as well as play and pause music. The device can also work with PC, smart TV, etc.

Wide compatibility

The controller is compatible with a wide range of games (HID modulator required), including: PUBG, MC4, Wild blood, Dungeon Hunter, Zombie, FC simulator, GBA simulator, street simulator, SFC simulator, N64 simulator, Shadowgun, FC.

* With the update of selected games, there is a possibility of gamepad compatibility problems.

Rechargeable battery

The built-in 300 mAh battery allows for 10 hours of operation. To save power, the controller goes into standby mode when connection is lost.
