

Petwant F14 WIFI Automatic Feed Dispenser White

Petwant F14 WIFI Automatic Feed Dispenser White

Ref: 5906168436130

Petwant F14 WIFI White automatic pet food dispenser.

Take care of your pet and ensure reliable access to fresh, delicious food. The Petwant F14 WIFI smart dispenser stands out with a capacity of up to 3 liters and allows you to conveniently plan feeding schedules. Its operation is facilitated by a dedicated app - just a few clicks on your phone! The device also allows you to record short voice messages. What's more, durable, damage-resistant materials have been used to make it safe for use in contact with food.

Create a feeding schedule

Have confidence that your pet will always get its food on time. The dispenser allows you to schedule up to 4 meals per day (up to 9 servings of food each). Convenient scheduling is made possible by a dedicated app. Now you can easily manage your pet's feeding wherever you are - at home, at work and while traveling. All you have to do is reach for your phone!

Transparent food container

The dispenser is equipped with a large reservoir that holds up to 3 liters of food. This is enough to provide your pet with food for up to 10-15 days! In addition, it is transparent, so you can check at any time how much food is left. It is worth remembering that the device works well with dry food in sizes from 5 mm to 12 mm.

Record a short message

Want your pet to be called for a meal every time? No problem - the dispenser is equipped with a speaker and microphone, allowing you to record a short, 10-second message and then play it back.

Two ways to power

The Petwant F14 WIFI dispenser offers two ways to power it - from an outlet or using three Type D alkaline batteries (not included). Using the second method, you can enjoy wireless operation of the device for up to 180 days. Don't be afraid that it will refuse to serve you at the least opportune moment!

Refined in every detail

The dispenser's bowl was created from 304 stainless steel, so it is fully safe for pets and can be used in contact with food without any obstacles. Its cleaning will also not cause you any problems. What's more, the device is equipped with a container with desiccant, which makes the food stored in the container stay dry and fresh for a long time.
