Sonic toothbrush with tip set and water fosser FairyWill FW-

Sonic toothbrush with tip set and water fosser FW-507+FW-502E

Amaze everyone with a dazzling smile. The ADA-approved FairyWill FW507 sonic toothbrush generates vibrations at up to 40,000 per minute and offers 5 modes to choose from. It is also equipped with a smart 2-minute timer. Its long-lasting battery provides a runtime of up to 30 days on a single charge. Moreover, you will also find the FairyWill 502E irrigator in the package, which has 3 modes to choose from and allows you to clean your teeth thoroughly. It is equipped with a 300 ml water tank, which you will have no problem refilling.

Even more thorough cleaning

High vibration frequency enables the FW507 sonic toothbrush to thoroughly clean your teeth in as little as 2 minutes! It also features a smart timer that gives you a brief pause every 30 seconds to remind you to change the area you're brushing. After 2 minutes, the toothbrush will turn off automatically.

5 operating modes to choose from

Customize the action of the toothbrush to suit your needs. The device offers 5 modes to choose from. Clean is perfect for everyday use, while White will get rid of the most stubborn tartar and stains. Massage mode massages your gums and Polish mode polishes your front

teeth. A gentle Sensitive mode is also available.

Waterproof

Use the toothbrush in the shower or bath without worry. It's IPX7 waterproof, so you won't be splashed! You can also safely rinse it under running water after each use, extending its life and reducing the risk of bacteria proliferation.

Interchangeable tips included

The set includes 4 replacement toothbrush tips. You can distribute them among your family members or keep them for yourself as a spare. You don't have to remember to replace them either! After some time, the colored bristles of the tip will start to fade, which means you should throw it away and install a new one.

Long runtime

This toothbrush is equipped with a long-lasting battery that allows it to serve you perfectly for up to 30 days on a single charge. It takes about 4 hours to recharge it. The device supports a voltage range of 110-240V, which means that you can easily connect it not only to a regular mains charger, but also to a powerbank or laptop, for example.

Complete oral hygiene

The irrigator effectively eliminates up to 99.99% of food debris and tartar while providing a deep gum massage and improving circulation. So you can not only clean your teeth thoroughly, but also improve the condition of your teeth. The enhanced pulsating technology allows the 30-100 PSI water pressure jet to reach even those areas of the mouth that ordinary toothbrushes cannot reach.

3 modes of operation

Adjust the operation of the irrigator to your needs. The device offers 3 cleaning modes. The CLEAN mode is perfect for everyday use. The water pulses at a rate of 1800 times per minute to effectively clean your mouth. The Soft mode is suitable for beginners and those with sensitive teeth. The frequency of 1400 times per minute allows for a thorough yet gentle cleaning. The Massage mode (1400-1800 times per minute) will clean your teeth thoroughly while providing a gum massage.

Practical water tank

The irrigator is equipped with a large 300ml water tank. This is enough to allow you to brush your teeth thoroughly without having to refill it. When needed, you can easily clean it, thus preventing the proliferation of bacteria. Moreover, thanks to its improved design, the reservoir does not leak and filling it with water is child's play and quick.

4 interchangeable nozzles included

In the set, you will find as many as 4 nozzles for the irrigator. This way, your whole family can use it to brush their teeth. All the tips are relatively long and rotate 360°, allowing you to reach even hard-to-reach areas of your mouth. Note: to avoid the proliferation of bacteria and maintain hygiene, we recommend replacing the nozzle every 3 months or so.

Long runtime

The cordless irrigator design gives you almost unlimited freedom. The device is equipped with a long-lasting lithium battery that allows it to run for up to 21 days on a single charge. To charge it, simply plug it into a charger, powerbank or even your laptop using the included USB cable. After about 4 hours, it will be fully operational again!

Waterproof

Use your irrigator in the bathroom, shower or bath without worry. The device is IPX7 water-resistant - no accidental splashing! The product is also equipped with double seals, which effectively prevent possible leaks. If necessary, you can also clean the irrigator to keep it in perfect condition even longer.

Lightweight and portable

The FairyWill 5020E irrigator is incredibly lightweight and portable. Thanks to its ergonomic design, it fits perfectly in your hand and provides comfort. If you want, you can easily take it with you on vacation - it will not take up too much space in your bag or suitcase. It will also not be a big burden.
