

## Humidifier with light Sothing DSHJ-H-009 (white)

Humidifier with light Sothing DSHJ-H-009 (white)

Ref: 6933172188419

Sothing DSHJ-H-009 humidifier with light (white).

The deer-shaped humidifier with light fits perfectly into any interior, offering not only effective humidification, but also pleasant LED lighting. With its 260 ml capacity and 50 ml/h output, it effectively takes care of the right level of humidity in the room, while operating quietly and efficiently.

Cute design of a deer on a sleigh

Sothing DSHJ-H-009 is distinguished by its unique design of a deer on a sleigh. Its round body, adorable antlers and nose details give the device a unique look. As a result, the humidifier not only improves air quality, but also makes an interesting decoration. The base in the form of a sleigh helps distribute the water mist evenly, which increases the efficiency of humidification and adds charm to the whole device.

Modern nano atomization technology

Thanks to the nano atomization technology, the humidifier evenly distributes a fine water mist, which helps maintain the right level of humidity. The ultrasonic atomizer creates water particles with a size of 2.5 microns, which do not form large droplets, but instead subtly humidify the air without creating damp patches in the environment.

### Functionality and convenience

The Sothing DSHJ-H-009 humidifier is equipped with an automatic shut-off function after 4 or 6 hours for added safety and comfort. The built-in LED light emits a warm, pleasant white light, which works well as a bedside lamp. The device is easy to use, and its quiet operation makes it ideal for bedrooms or children's rooms.
