Ref: 5906168439339

KJK 48MP 1920x1080p WIFI photo trap ( KJK-HC230 )

KJK 48MP 1920x1080p WIFI Fotopułap ( KJK-HC230 ).

KJK 48MP 1920x1080p WIFI Fotopułapka ( KJK-HC230 ) is an innovative device designed for professional wildlife monitoring. With exceptional photo and video quality, fast response time and advanced features, this camera is the perfect tool for anyone who wants to capture fleeting moments of wildlife in the highest quality. In addition, built-in WiFi connectivity and operation via a mobile app make using this photcamera easy and convenient.

#### Easy WiFi connectivity and app control

The KJK 48MP 1920x1080p WiFi camera allows you to quickly connect to your phone using built-in WiFi and Bluetooth technology. The free "TrailCam GO" app allows you to conveniently manage the camera's settings, view photos and videos, and download them without the need for physical contact with the device. This allows you to monitor nature from anywhere, without having to pull out the memory card.

#### Unparalleled image resolution

The KJK-HC230 photopic camera offers up to 48 megapixel images and up to 1920x1080p video recording with sound. As a result, the camera captures every detail in crisp colors and sharp contours, making each recording extremely realistic and full of detail. High-quality video recordings with sound allow you to fully immerse yourself in the scene you are observing, making this device an ideal tool for

professionals and amateur naturalists.

#### Excellent night vision

Equipped with 45 940-nm No-Glow LEDs, the KJK-HC230 photo trap provides excellent night vision up to 100 feet. This makes it possible to record nocturnal animal activity without the risk of spooking animals. Adaptive illumination technology prevents overexposure and dimming of the image, ensuring clear photos and videos in any lighting conditions, even in total darkness.

#### Super-fast response time and wide detection angle

The KJK-HC230 photo trap is equipped with three sensitive PIR sensors and an impressive response time of just 0.05 - 0.5sec. This means that any movement within 100 feet is instantly recorded. The 130° detection angle provides a wide field of view, which is ideal for monitoring larger areas and capturing even the slightest movement.

#### IP66 waterproof and rugged design

The KJK-HC230 camera is IP66 waterproof, making it resistant to rain, snow and dust, as well as extreme temperatures from -22°F to 158°F. This makes the device ready to operate in the harshest environmental conditions, such as deserts, rainforests and mountainous areas. Additional features such as password protection, looping of recordings, and the ability to set a custom monitoring period make this camera not only rugged, but also versatile.
