KJK 20MP 1920x1080p Fotopułap (GE-HC229)

Ref: 5906168439322

KJK 20MP 1920x1080p Fotopułka (GE-HC229)

The KJK 20MP 1920x1080p Photocamera (model GE-HC229) is a state-of-the-art device with exceptional image and video quality, ideal for wildlife monitoring, hunting and environmental observation. Equipped with advanced technology and rugged construction, this camera performs well in harsh field conditions. Designed with wildlife enthusiasts in mind, this camera allows you to capture even the most fleeting moments in the highest quality.

Ultra-sharp resolution

The KJK GE-HC229 offers up to 20-megapixel still images and 1920x1080p video recording with sound, allowing you to capture wildlife with extreme accuracy and detail. With such high resolution, every detail is clear and sharp, and videos are smooth and vibrant. The camera is equipped with advanced optical technology to capture clear and detailed footage, making it an ideal tool for wildlife observation and surveillance.

Invisible night vision

The KJK 20MP 1920x1080p camera is equipped with 45 LEDs with invisible infrared light (950 nm) for excellent night vision without scaring animals. Adaptive illumination technology prevents overexposure and over-darkening of the image, allowing you to get bright and clear photos and videos in total darkness. So you can be sure not to miss any important moment, even at night.

Super-fast response time and wide viewing angle

The KJK GE-HC229 photo trap features an extremely fast response time of 0.05 to 0.5 seconds. Instantly capturing any movement within its range, which is crucial when monitoring wildlife or observing animals. Its wide 130° detection angle allows it to capture a larger area, which is invaluable for monitoring large areas without betraying its presence.

Resistant to harsh weather conditions

The KJK GE-HC229 is an IP66-rated waterproof camera, which means it is resistant to rain, snow, dust and other adverse weather conditions. Robust construction and excellent seals protect the camera from damage caused by moisture and dust, making it ideal for harsh environments such as deserts, savannas and rainforests. This makes the device an ideal choice for anyone who needs a reliable camera for nature monitoring, regardless of the conditions.
