KJK 20MP 1080p photo trap (KJK-HC202-1)

The KJK 20MP 1080p Photocamera (model KJK-HC202-1) is a compact device with advanced features, ideal for wildlife monitoring, hunting, property surveillance and vegetation observation. With exceptional image quality and easy operation, this camera is an excellent choice for both novice users and advanced nature lovers.

High quality images

Thanks to its advanced image sensor and high-quality optical lens, the KJK-HC202-1 photocamera captures images of up to 20 megapixels and smooth video up to 1080p. Built-in low-light-emitting LEDs (850 nm) ensure excellent visibility both during the day and at night, as well as in low-light conditions. In addition, a built-in noise-canceling speaker and a 2-inch color TFT screen provide full immersion into the world of wildlife.

Excellent visibility at night

The camera is equipped with 22 low-light-emitting LEDs that provide reliable nighttime visibility at distances of up to 75 feet. The 850-nm infrared technology makes the camera virtually invisible to animals, allowing it to discreetly record their nocturnal behavior. Adaptive lighting technology avoids overexposure and underexposure, ensuring clear images and videos even in total darkness.

Super-fast response time and wide viewing angle

The KJK-HC202-1 photo trap is distinguished by its super-fast response time of less than 0.1 - 0.5 seconds, allowing it to capture any movement within the camera's range. Combined with a 130° detection angle, the camera provides a wide field of view, ideal for monitoring large areas. With the option to select from 1 to 3 shots per trigger, you'll never miss any activity in the camera's field of view.

Easy installation and operation

The KJK-HC202-1 photo trap is designed for easy operation. The built-in 2-inch color screen and TV remote control-style buttons allow you to quickly set up and view footage without the need for Wi-Fi, SIM cards or mobile apps. The included mounting straps and brackets allow the camera to be mounted in a variety of locations and angles. A detailed instruction manual allows you to get started with the camera quickly and without hassle.

Ruggedness to withstand harsh conditions

With an IP66 waterproof rating, the KJK-HC202-1 photo trap is resistant to rain, dust and fog, allowing it to be used in extreme conditions such as deserts and rainforests. The camera is also resistant to extreme temperatures of -22°F to 158°F, making it ideal for all-weather surveillance. The unit's compact size makes it easy to conceal and transport, and reduces the risk of theft or damage.
