Superfire GM03 workshop flashlight

The Superfire GM03 is a versatile flashlight that will work in many situations - from everyday tasks to various types of repairs. Equipped with a powerful LED, it offers a brightness of 920 lumens, providing excellent illumination even in the darkest conditions. Thanks to the built-in 18650 battery with a capacity of 5200 mAh, it works for up to 4 hours on a single charge, and the powerbank function allows you to charge other devices.

Functionality and convenience of use

You can adjust the position of the lamp by 210° and the handle by 180°, which further increases the comfort of use. Thanks to the magnetic base, the flashlight is ideal for repair work, allowing stable attachment to metal surfaces. Charging is done via a USB-C port, and the light indicator makes it easy to monitor the battery status.

Refined design

The flashlight offers 7 different modes, including white and red light, allowing you to adjust the illumination to suit your current needs. The high brightness makes the Superfire GM03 ideal for outdoor use. In addition, the flashlight is IPX5 waterproof, which protects it from rain and splashes, ensuring reliability even in harsh weather conditions.
