UV Superfire HZ01 head flashlight

Ref: 6975515771162

Superfire HZ01 UV headlamp flashlight

The Superfire HZ01 is equipped with a 395 nm UV LED, so it offers precise and stable illumination that can be used for a wide range of specialized tasks, such as checking original documents, identifying mold or technical diagnostics. The high quality of the UV light allows it to accurately detect details invisible to the naked eye, making it ideal for professionals who need a tool for working in a variety of conditions.

2 types of light: UV and white light

The Superfire flashlight offers 2 types of light that can be conveniently switched. The powerful white light is ideal for everyday tasks such as construction work, camping or cycling at night. The violet UV light, on the other hand, is suited for more specialized applications, such as mold detection or checking the authenticity of documents or banknotes. Switching modes is easy - just press a button to switch from bright white light to violet UV, allowing you to respond quickly to changing needs.

High quality and advanced features

The Superfire headlamp is equipped with a number of practical features that enhance the user experience. One of them is a motion sensor that allows you to turn the light on and off with a gesture. The flashlight also allows you to adjust the angle up to 90°, so that the light can be directed exactly where you need it.

Detection and safety with UV technology

One of the key strengths of the Superfire flashlight is its detection function using UV light. With a wavelength of 395 nm, the flashlight is perfect for identifying counterfeit banknotes, making it an indispensable tool in financial institutions or for those dealing in antiques. In addition, UV light is useful in detecting mold, which can develop on various surfaces, and in monitoring cleanliness in homes, workshops and other workplaces.

Robust design and comfort of use

The Superfire flashlight was designed with user comfort in mind. Equipped with an elastic head strap that can be freely adjusted, it adjusts to the size of the head, ensuring comfort during prolonged wear. The overall design is made of durable materials, resistant to harsh conditions, making the flashlight an ideal choice for outdoor work. The rugged housing protects the internal components from mechanical damage, and the water resistance (IP44) provides protection during rain or moisture.

Included

head flashlight
USB-A to USB-C cable
AB10 x2 batteries

Manufacturer Superfire
Model HZ01
Light source white + 395 nm UV
Range 360 m
Working time approximately 4 h (white light), 4.5 h (violet light)
Dimensions 40 x 55 mm
Charging time 3 h
Material aluminum alloy, ABS
Weight 152 g
Water resistance IP44
Operating modes White light: high brightness, low brightness; violet light: high brightness, low brightness

Preço:

€ 35.50
