Petoneer NutriVue smart food dispenser with camera

Petoneer NutriVue smart food dispenser with camera

Ensure your pet gets healthy and regular meals, even when you're away from home, with the Petoneer NutriVue smart food dispenser. This advanced device is designed with cats and small dogs in mind, guaranteeing them constant access to fresh food for days. With a capacity of 2.6 L, the dispenser will meet your pet's needs for 10-15 days, making it ideal for unexpected trips or short vacations.

Precise control of portions and eating habits

The Petoneer app allows you to precisely set timers and food portions, helping your pet develop healthy eating habits and avoid becoming overweight. In addition, thanks to the cloud-enabled app, you can monitor and analyze your pet's eating habits for even better diet control.

Safe and hygienic food storage

Petoneer NutriVue has been designed with attention to food hygiene and freshness. The high-quality 360° silicone seal ring and desiccant cabinet in the lid effectively protect the food from moisture and oxidation, ensuring its freshness for longer. The transparent design allows you to monitor the amount of food in the dispenser in real time, and built-in smart sensors will notify you via the app when it needs to be replenished.

Monitoring habits and interacting with your pet

The built-in 1080p high-definition camera allows real-time viewing and monitoring of your pet's feeding habits. With night vision and infrared sensors, the camera automatically switches to night mode, providing clear images even in the dark. The wide-angle lens (115.7° horizontally and 67.8°/146.8° vertically) captures every detail, and the motion zone customization option allows you to monitor your pet's every move. What's more, the Petoneer app allows you to record a voice that will call your pet to eat, creating the impression that you are at home.

Record your most wonderful moments and share them with others

With support for micro SD cards of up to 256GB, you have the ability to record and play back your pet's greatest moments. You can also edit and share your recordings using the daily video editor. Now you can capture every adorable moment and be sure that your memories with your pet will remain for a long time.

Simple installation and easy cleaning

Assembling and disassembling the Petoneer NutriVue dispenser is child's play - just one turn to remove the lid. The parts are made of durable ABS and are easy to clean, and the bowl itself is dishwasher safe. The bowl is resistant to bumps and bites, and its design makes it repel oil, making cleaning it quick and convenient.

Safety and robust design

The dispenser features non-slip pads to prevent sliding, and a sealed outlet to prevent your pet from sneaking food and protect food from insects. The rotor is designed to prevent jams, and if one occurs, the reversing mechanism rotates in the opposite direction for continuous operation.

Elegant design and full mobility

With its compact and lightweight design (1.65 kg), the Petoneer NutriVue dispenser is easy to carry and transport, and its minimalist design means it will look stylish in any room. Invest in a Petoneer smart food dispenser and keep your pet healthy and comfortable, even when you're not at home!
