

Double breast pump Momcozy M6 (gray)

Double breast pump Momcozy M6 (gray)

Ref: 0762765367292

Momcozy M6 double breast pump (gray).

Momcozy M6 is a modern, discreet and easy-to-use double breast pump that perfectly fits the needs of modern women. Thanks to its advanced suction technology, developed on the basis of more than 1,000 trials and feedback from moms, and its ergonomic design, the device effectively supports the lactation process. A dedicated app is available to enhance daily use. The kit includes inserts in various sizes.

Optimal sucking rhythm

The optimal sucking rhythm and frequency, created on the basis of research and feedback from female users, contribute to increasing milk supply. With three modes of operation (Stimulation, Expression, Mixed) and nine levels of intensity, each mom can adjust the operation of the breast pump to her needs.

Second generation motor

The Momcozy breast pump uses a second-generation motor, offering suction of 295 mmHg. The solution used ensures pumping efficiency and helps pump milk efficiently.

Discreet, ergonomic design

The M6 features a compact, discreet design and fits perfectly into a bra. As a result, you can wear it almost invisibly and use it freely anywhere without having to use your hands. The ergonomic design adapts to the shape of your breasts for maximum comfort and effectiveness. The device combines a soft and hard silicone seal, ensuring high comfort and safety. The design used also facilitates the installation of the insertion - the set includes four size variants.

Carefully selected materials

The Momcozy M6 breast pump uses Tritan material, which is not only durable and resistant to damage, but also safe for the health of mom and baby. It meets rigorous safety standards, as evidenced by GREENGUARD certification. Thanks to the transparent design, you can conveniently monitor the amount of pumped milk.

Powerful battery and ease of use

The 1350 mAh battery allows you to work continuously for 180 minutes on a single charge, which is equivalent to 6 pumping sessions. The breast pump is equipped with an easy-to-read LED display, which shows information about working time, battery status and selected intensity, making it easy to use the device. You won't find it difficult to clean it either.
